

N-220

Premium, Water-Miscible One-Step Blanket and Roller Wash

Description

Nova N-220 was formulated to be the premium, water-miscible blanket and roller wash product for use in sheetfed and web-cleaning applications. It is a special blend of solvents and emulsifiers, formulated so that when mixed with water, cleaning performance is not sacrificed and surfactants are removed with water rinsing. N-220 is recommended to use to eliminate the build-up of paper lint piling.

Product Need and Usage

N-220 offers the printer the best possible performance on difficult to clean blankets and rollers. It has the extra-cleaning power for heavy piling, yet is friendly and economical to use, is compatible with press elastomers and equipment, and is compliant with environmental regulations.

Directions

Blankets: Apply N-220 to water-dampened cloth, wipe blanket until ink is removed. For best results, follow with a water-dampened cloth to remove all residual contaminants. Alternately, add 20% to 50% water to N-220 wash in a wash-up bottle. Shake well before using.
Rollers: Apply N-220 directly to rollers, engage wash-up blade, allow ink to run off and repeat until ink is removed. Finish with a water rinse to remove all residues.

Features

- * Efficient removal of blanket piling, minimizing down time.
- * Non-damaging to blankets and rollers.
- * High flash point.
- * Pleasant citrus odor.

Technical Specifications

Drying Speed	Medium
Water-Miscible	Yes
Flash Point (°F TCC)	107
VOC (lb/gal method 24)	6.67
Vapor Pressure (mm HG)	2.1
Odor/Fragrance	Medium / Sweet
