

N-312SPT

Water-Miscible Blanket and Roller Wash

Description

Nova N-312SPT is a water-miscible, high flash point wash containing no aromatic hydrocarbon solvents. It is formulated to have good ink penetrating and cutting power along with excellent cleaning of piling and paper lint. N-312SPT is mild, user friendly and safe for use on buna-nitrile rubber compounds.

Product Need and Usage

Nova N-312SPT is targeted for use on coldset and heatset web presses. It meets special regulatory requirements having no aromatic hydrocarbons and the 142°F flash point qualifies it as a non-hazardous for waste disposal.

Directions

Blankets: Apply N-312SPT to water-dampened cloth, wipe blanket until ink is removed. For best results, follow with a water-dampened cloth to remove all residual contaminants. Alternately, add 20% to 50% water to N-312SPT in a wash-up bottle. Shake well before using.

Rollers: Apply N-312SPT directly to rollers, engage wash-up blade, allow ink to run off and repeat until ink is removed. Finish with a water rinse to remove all residues.

Features

- * Water-miscible, excellent for lint and piling removal.
- * High flash point, non-hazardous waste.
- * Mild user-friendly formula for hand wash applications.
- * Safe on buna-nitrile rubber compounds.

Technical Specifications

Drying Speed	Slow
Water-Miscible	Yes
Flash Point (°F TCC)	145
VOC (lb/gal method 24)	6.60
Vapor Pressure (mm HG)	0.5
Odor/Fragrance	Mild / Citrus
