

N-366

Universal Wash

Description

N-366 Universal Wash is a unique formula that will work in UV, Hybrid and conventional ink cleaning roles, and is compatible with both UV and nitrile rubber compounds. It contains no hazardous air pollutants or U.S. toxic release inventory listed reportable compounds. Fogra approval is pending.

Directions

Blankets: Apply N-366 Universal Wash with a shop cloth and wipe blanket until clean.
Rollers: Apply N-366 to rollers and allow the ink to loosen. Engage wash-up blade and repeat applications of N-366 until clean.
Automatic Washer: Follow blanket wash equipment manufacturer instructions.

Product Need and Usage

The implementation of UV/Hybrid inks introduces some difficult challenges for cleaning and rubber compatibility. The N-366 Universal Wash is formulated to meet these requirements along with maintaining excellent health, safety and environmental compatibility.

Features

- * Cleans UV, hybrid, and conventional inks.
- * High flash point.
- * Effective for use on conventional, UV or hybrid inks.
- * Safe for use on nitrile and EPDM rubber compounds.

Technical Specifications

Drying Speed	Slow
Water-Miscible	Yes
Flash Point (°F TCC)	180
VOC (lb/gal method 24)	7.00
Vapor Pressure (mm HG)	0.2
Odor/Fragrance	Mild / Sweet
